

CHRONOS

How young is your muscle?

EIT HEALTH CHRONOS IDEATION EVENT

WHERE? IESE Business School, North Campus. Carrer d'Arnús i de Garí, nº 3-7,
08034 Barcelona. Aula Q-102

WHEN? Monday, 1 October 2018 (from 9am until 5pm)

REGISTRATION: [click here to register](#) before september 20th!

With the **increasing age of the EU population**, solutions that help people maintain mobility and function for **healthy ageing** take on increasing importance. CHRONOS is a project to develop an efficient medical device for measuring the **Motor Functional Age (MFA)**, a new concept related to **motor functional abilities**, by evaluating muscle contraction and kinematic abilities. The device will support **intervention strategies** for prevention and active ageing, and lessen the burden on healthcare systems caused by **losses of muscular function**.

CHRONOS is an innovation project funded by **EIT Health**, which aims to accelerate both innovation and entrepreneurship in healthy living and active aging, by providing Europe's top talents with new opportunities and resources for the benefit of all citizens. In CHRONOS, EIT Health brings together 7 complementary partners with similar interests and common goals that respond to the triangle model of research-industry-end user.

The project coordinated by the Sorbonne University of Paris, co-led by B.V. University of Technology of Compiègne in collaboration with IESE Business School, ABBOTT, e-Seniors, Assistance Publique Hôpitaux de Paris, TMS International.

Let's get valuable insights!

The CHRONOS workshop will help to better understand the patients/ caregivers needs and professional expectations, especially of the healthcare professionals (HCPs) working in hospitals, nursing homes, GPs, rehabilitation centres and nutritional healthcare industries in the European Union. We will focus the attention on innovative and inspiring ideas!

Let's network!

You will be involved in a fruitful discussion around targeted patients on preventing the premature muscle aging, frailty, functional motor loss and dependence. Your insights will be addressed in the best way in order to improve innovative solutions within the healthcare sector. The event is also a great networking opportunity to exchange your ideas and experience!
